Art Unit: 1616

## **RESTRICTION INTO GROUPS**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, drawn to composition comprising a living pathogen-targeting organic moiety and a radioisotope, classified in class 424, subclass 1.65.
  - II. Claims 10-18, drawn to methods of treating infectious diseases, classified in class 424, subclass 9.1.
2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the composition used in the method may be an antibody, virus, or any other living blood-borne pathogen.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

**ELECTION OF SPECIES (for search purposes only)**

5. Claims 1-18 encompass a multitude of living pathogen-targeting organic moieties. In particular, the targeting moiety may be a virus, antibody, or any other living pathogen known to man. Thus, Applicant is respectfully requested to elect a single disclosed species, even though this requirement is traversed.

*Note: The Examiner respectfully requests that the Applicant elect a single disclose species from within the elected group. If Group I is elected, Applicant is respectfully requested to elect a living pathogen-targeting organic moiety, a radioisotope, and a support. If Group II is elected, Applicant is respectfully requested to elect a blood-borne pathogen, a radioisotope, and a support. In addition, Applicant is respectfully requested to state which claims are drawn to the elected species.*

6. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. L. Jones whose telephone number is (703) 308-4640. The examiner can normally be reached on Mon.-Fri. (alternate Mon.), 6:45 a.m. - 4:15 p.m..
